Palembang, South Sumatera, Indonesia

ABOUT

An ambitious Telecommunication Engineering student and aspiring AI/Machine Learning Engineer with a strong foundation in data analysis, IoT, and intelligent systems. Demonstrates proven industry experience through successful internships at PT Telkom Indonesia, alongside completing the Asah 2025 bootcamp program by Dicoding. A proactive developer with a track record of building complex, end-to-end solutions, recently demonstrated by designing and deploying an integrated LoRa IoT environmental website-based monitoring system powered by LightGBM machine learning algorithms and LoRa Meshtastic decentralized mesh networking for a capstone final project.

EDUCATION

Sriwijaya State Polytechnic – Diploma 4 in Telecommunication Engineering Sep 2022 – Aug 2026
GPA: 3,79/4,00

Muhammadiyah 1 Senior High School Palembang – Science Department Aug 2018 – July 2021
GPA: 89,25/100

WORK & TRAINING EXPERIENCES

PT. Telkom Indonesia Tbk., Witel Sumbagsel 5 Months, Feb 2025 – Jul 2025

Network Area Division – Internship

- Assisting technicians during quality checking or repairing fiber-optic cable related cases such as splicing core, measuring Loss/attenuation value, etc.
- Building a classification and clustering based Machine Learning Model to detect Anomaly from an OTDR's measurement results dataset for a project of the internship program.

Nidha Cipta Edotama 1 Month, November 2024

Industrial IoT, PLC Programming, and SCADA Certificated Competitive Fund Internship & Workshop

- Actively participated in two weeks intensive training about Industrial IoT, Programmable Logic Controller (PLC), and Supervisory Control and Data Acquisition (SCADA).
- Coordinate with another student as a team on building a monitoring system using SCADA, integrated with PLC and some sensors with IoT based architecture.

Asah 2025 Program led by Dicoding in association with Accenture 5 Months, Aug 2025 – Jan 2026

Machine Learning Cohort

- Successfully completed several courses in AI and Machine Learning and achieving exceptional final grades.
- Coordinate teammate as a capstone project team leader to build a drug discovery system by integrating Agentic AI and deployed fullstack website.

PROJECTS

- Building a Website-based Monitoring system for Environment Quality of Hydroponic Garden by integrating LightGBM Classifier Model and LoRa Meshtastic Technology. This project is also conducted as part of a university-led research and community outreach program.
- Involved as AI orchestrator for Capstone Project at Asah 2025 Program led by Dicoding in Association with Accenture, for integrating Google Gemini API as Agentic AI in Chemical Compound of Drug Discovery.
- Designing and building a Classification and Clustering Machine Learning Model System for anomaly detection in OTDR's measurement results dataset, using Orange Data Mining software as the tool and Random Forest as model predictors for my internship contributive project.
- Building a Monitoring and Control System for some sensors integrated with programmed PLC connected via internet.

ACHIEVEMENTS & CERTIFICATION

- Journal Article publication in Machine Learning topics in "Jurnal Algoritma" (November 2026)
- Best Graduate of the Electrical Engineering Department at 42nd Polsri's Graduation (August 2026)
- Certified for several courses focused on AI and Machine Learning by Dicoding. (December 2025)
- Industrial IoT, PLC Programming and SCADA Certification by Nidha Cipta Edotama. (November 2024)
- IoT Workshop Trainer for Faircos 2023. (October 2023)

SKILLS

Language : Bahasa Indonesia (Native), English (Advance)

Technical : LoRa, Meshtastic, GitHub, TensorFlow, Keras, PyTorch, Docker, Visual Studio Code, Arduino, Python.
